FOOD PARCEL PROJECTS

We are proud to work with a range of organisations to design and deliver specialised food parcel projects that make a difference in communities.

We optimise nutritional value against the available budget, take care of the logistics and help maximise impact.

In 2021, we partnered with township retailers on a number of projects. These included a JP Morgan-funded relief project, that utilised local stores as a last mile parcel drop off point. This project realised additional store traffic and extra income for the traders, while the beneficiaries could conveniently collect their goods near their homes.

COMMUNITY KITCHEN PROJECTS

Daily nutrition is at the forefront of our projects and partnerships with community kitchens, hospitals, non-profit organisations, ECD's, schools and businesses.

We handle the complex procurement and logistics processes which saves time and money; this means our clients can divert these resources to increasing their impact.

Our partnership with The Winnie Mabaso Foundation saved them time and money. We helped them support township retailers, deliver food parcels to vulnerable families and increase the number of community kitchen meals cooked for the Meriting community.
